SCISSOR

NOW AVAILABLE

NEW LINE OF POLYGLIDE FEET

POLYGLIDE FEET have a POLYIMIDE PTFE coating. This is a new technology for the sewing industry.

The POLYIMIDE PTFE coating helps eliminate drag and puckering. These feet are recommended for use when sewing laminated foam, rubber fabrics, plastics, synthetic materials, leatherette, vinly materials, pile fabrics, etc. They help increase production, reduce costs and give you the very best performance when using these difficult-to-sew materials.
